---

million people in the United States used online dating sites (see Dating Site Statistics). That's a lot of people and plenty of options to choose from. The biggest problem that most people have when it comes to online dating is that they don't know where to go to find a good match. In this article, we'll show you the top 5 online dating sites on the market and how you can start meeting people who can become your potential mate. A number of free sites are also available, but there are some downsides to them as well. We'll cover those too. Online Dating Sites To get the most out of online dating, you have to be cautious. There are a number of sites out there that will cost you a lot of money or that could scam you. The best online dating sites will have a strong list of features that you can use to connect with potential dates. These features could be something as simple as the ability to upload your picture or send a quick message to potential dates. Other sites will have more powerful features that allow you to find more matches for you. Some sites like Match.com have entire sections for people who are looking for very specific types of people. You can choose to search for people that are similar to you or for people that are compatible with you.

----- The best security to protect your privacy, please  
Subscribe W10Privacy is one of the many specialized applications that focus on removing all tracking elements from your PC, even if you are not a tech-savvy user. However, it is best to create a restore point before tampering with any of the settings. Straightforward portable app This utility comes with a user-friendly graphic interface, and all its available functions are neatly organized into tabs, each featuring a relevant title. Moreover, W10Privacy is a portable solution, which means that you do not need to install on your PC to enjoy its feature-set. Despite its name, it can also be used on Windows 8.1 computers without any issues. Protect user privacy with dedicated tweaks You can start by disabling location details about your device, turn off SmartScreen Filter or prevent programs from using your advertising ID for experiences across apps. Additionally, you can stop other software utilities from accessing your calendar entries, your messages, account info (such as name or

---

picture) or radio stations. W10Privacy can also help you disable speech recognition or the option to display the password while also preventing the camera to be used on the lock screen. When it comes to blocking telemetry and data collection, you set this application to block IP addresses of known Microsoft telemetry servers through the HOSTS file or firewall rules. Disable app-related settings Edge is the new default browser of Windows 10, and you can alter some of its options to protect your online privacy. As such, you can disable saving passwords or form entries, block third-party cookies or prevent SmartScreen Filter from protecting against suspicious downloads and websites. OneDrive can be stopped from running at startup, and it can also be removed from the File Explorer sidebar. If you are willing to restart your device, you can prevent the usage of OneDrive for file storage. To wrap it up, there are many tweaks you can make to your PC using W10Privacy, yet you should take the time to research them before applying them, lest you end up affecting your PC

**What's New in the W10Privacy?**

Privacy is important for all persons since nobody likes to have their movements tracked every step of the way. The same goes for computer users, no matter the operating
