I have been developing AV software since 1993. Then in 1997 I start writing a AV app called "Keyspan" in Borland C++ Builder. In late 2005, I decided to re-program Keyspan and the start a new project. So I started working on the new project and it's called "Keymacro". It was easier to work on the new project because of the rapid

development of Windows and development tools. Keymacro uses Visual Basic 2010 to develop. It has a great user interface and has basic registry features. Keymacro is an easy to use and complete AV product that enable the user to create an organized library of active X controls and DLLs. I found other AV products difficult to use. So my intent is to have Keymacro easy to use and complete. Keymacro is an ideal product for using in new projects or for adding to your existing projects. Some features of Keymacro: Visual Basic 2010 ActiveX OCX/DLL/AX Control/DLL Registries Edit/Replace control names Multi-Control (OCX/AX) Unique Control Names Duplicate Control Name Checker Duplicate ActiveX OCX/DLL and check Virtual control Virtual DLL Simplified Serial Numbering Multiple Button Registration Ungroupable OCX/DLL/AX Controls Name not found error Custom Control dialog boxes Registry overwrite for custom dialog boxes Version control for User Control Fixed ActiveX OCX/DLLs/AX for Windows Vista/7/8/8.1/10 Reliable registry change Uninstall of OCX/AX/DLL without deleting the directory Feature List: Visual Basic 2010 ActiveX OCX/AX/DLL/AX DLL Control/AX Control Multi-ActiveX Control/AX Control/DLL ActiveX Control/AX Control Dialog Boxes Full control of registry in ActiveX/DLL Control/AX Control Simple To Use Clean and simple user interface Customizable control registration and uninstall Common control errors Each control has default settings Simple to use for newbies Ready for ActiveX/DLL/AX/AX Control/AX Control Easy to use for old users Click on a button to generate dialog box License is included in the downloadQ: Unable to start IIS Express I can start and stop 77a5ca646e
