Run the autocad_precompiled_win.bat file. The next window will ask for the license key. You can download the autocad trial edition and enter the license key. You should see the following screen. Note that the 32-bit version should work for the 64-bit version. If you see the error message below, it means you are running the 64-bit Autodesk software on a 32-bit Operating System. You can get the 32-bit Windows. To do that, go to Windows section on the autocad_precompiled_win.bat file and change the setting as shown below. -----

Enhancements to Google Docs and Office 365 in AutoCAD: You can now save layouts to Google Docs and then apply them to your own designs. You can also send these layouts to your local printers. Autodesk 360 cloud services: The AppExchange search for AutoCAD has been extended to include more Autodesk cloud services, including Building CADD Service, Construct Service, and others. If you are not yet using the cloud, sign up now. For more information about Autodesk cloud services, visit the Autodesk 360 website. Workshop Scheduling: Autodesk Project Scheduler is now available on the web. You can also access it directly from within your AutoCAD desktop. The new scheduling capability allows you to set up multiple sessions for your engineering design team on a single date, and then launch each session. It works with the Mobile Scheduling app. Project Scheduler also lets you create and manage project events, which trigger automation workflows and release specific files to the app or Internet, as well as manage project activities. See below for more detail on these new capabilities: Import/Export of DWG files (Intelli-graphics and eSketch): AutoCAD 2020 introduced Intelli-graphics DWG files to make it possible to import a DWG file that has already been converted to eSketch. This new capability makes it easier to create a digital drawing using AutoCAD and a third-party application. AutoCAD Architecture: The addition of an AutoCAD Architecture subset allows you to create more sophisticated two-dimensional architectural drawings and develop connections among three-dimensional elements. You can create a framework or a blue-print for your design projects. AutoCAD Architecture files can be viewed from within AutoCAD and in a variety of CAD-related applications. For more information, visit the Autodesk Architects website. For example, you can import a 3D model into AutoCAD Architecture and create paper space for the rooms. You can then specify the dimensions of the rooms and create window facings, door facings, and other architectural components. There is a new Import 3D Model feature that allows you to import 3D models from many file formats, including 3D Studio Max and Rhino. You can also open or save models directly in AutoCAD Architecture. Automation Design Services:
