What's New in the?

MetaEdit+ is a reliable software that allows you to build your own modeling diagrams and objects without the need of writing code. The aforementioned application provides you with a simple, yet complete meta-modeling language that helps you to define the language concepts, their properties and the associated rules. This way, you can improve development productivity and quality by generating your personalized code directly from your models and diagrams. The example below shows the result of object editing. We can see here that the original 3D object (left side) was deformed in order to obtain the new 3D object (right side) of the same object. Feature Description Screenshots Publisher's Description >Metaedit is a tool for modeller and is available for free. It allows to create a variety of 2D and 3D models (e.g. furniture, cars, equipment etc) with complete control of their description and properties. If you create new properties, you can create the database from scratch, or simply take an existing database and extend it. >Once you have created a model, you can give it a name and then publish it. The model description can be in text or XML. It is then accessible from any application (e.g. design tools, web services, graphical editors, programs, games etc) which can read the model information. >The model can be displayed in multiple formats (BMP, DAT, GIF, JPG, PNG, PICT, TIFF, ZIP, etc) and can be read by many different programs. >Models can also be transformed into images. >Metaedit can be used with many different operating systems. >Metaedit is a free, open-source project. Any feature that you see in Metaedit is the result of your contribution to this project. You can help us to improve Metaedit. >Please contact us if you are interested in commercial support. This project is under development. We are still adding new features. The 3D editor is planned to be released in the next versions. What's New in this Release: • Added new template for graphics files. • Added new template for XML files. • Added new template for SMIL files.
