Kith - Lorebook Features Key:

- **3D Arcade Style Gameplay** - A mixture of duck-tailing and flipping on the sides. To Win the game you'll need to avoid the enemies while landing on their heads.
- **Circus Like Mechanics** - There is no timer, as you have the freedom to duck and flip between enemies.
- **Smooth Animations** - Moving from one level to the next always feels realistic and grounded. Each of the levels provides a new experience for the player, while managing to feel like part of one continuous world where movement feels smooth.
- **Rare Boss Fights** - I only remember one other game where the bosses are all silent and still, as they just wait for you to hit their head before they reset. They have been so far are hilarious. Not just for dogs, but for the humans too. They are the only playable boss levels at the moment!
- **Great Cartoon Art** - From the architecture of the game, to the backgrounds, to the characters, every image is beautifully rendered. It really feels like a cartoon.
