**What's new in Starry Moon Island Perimeter MP09:**

BACK.com is proud to present the first in a series of video interviews of film directors, "The Journey of a Film Director" in which they talk about their projects, process, vision, and most importantly their inspirations and goal in creating movies. The first interview in this series was with Alice Winocour who talked about her new film "The Maman in the Window" starring Catherine Deneuve. In this interview, she shares her experiences as a director, being influenced by her mother and, most of all, by John Cassavetes. Not surprising, there is a connection between both of them, but she said it's only apparent. She talks about many aspects of John's career and is especially excited to watch the limited edition DVD release of a film they had once collaborated on together. It's the beginning of the new year and with it comes another new story about one of our favorite entertainers, Jodie Foster. According to a recent Vanity Fair article, the former child star recently auditioned for the role of Bond girl in the film "Quantum of Solace". The article also says about her audition, "The character wouldn't necessarily have been a woman who could pull off suave-cool girl-tough-spy sexy. It would have been an independent, loyal strong girl who gets the job done. Of course, she did get the job done, which means the exercise proved useful". I'm very happy for Jodie. It looks like her rise to critical and commercial heights is coming together in a much better way than it did in the 90's. I know her from when she brought "Little Women" to life. The acting category was so heavily stacked at that time. She performed wonderfully, even though it was a lesser movie than the rest. I remember when she did "Little Women", Catherine Zeta Jones came to London to see her play. I was interviewed for the casting of the movie but it's a different story. In her Vanity Fair article, Jodie talks about her sleeping problems. She says, "You'll be in the middle of a conversation and you'll say something incredibly beautiful and truthful, and afterward you'll feel sort of like a hippo who just farted. It's just one of those things. Some days, even doing the most mundane aspects of a movie, like putting makeup on, I find myself thinking: 'Oh my God, I don

In the summer of 2012, there were still no signs that the majority of this world's population had already disappeared. A brief moment of idyllic tranquility — a brief moment that became the hope for all humanity — was shattered by an invasion of the malevolent "Ants of Kirisawa." When faced with a crisis, mankind's only remaining option was to make a stand. The battle was hard-fought and bitter, but the human populace succeeded in driving the ants back for the first time in generations. However, the clash between humans and the ants was not the end of the conflict. After ten months of ceaseless battles, mankind has driven the ants back to their home realm, the sunken continent of Kirisawa. Humans have set up a base in an uninhabited portion of the continent, and now they wait to see what plans the ants have in store. Dawn of Smiles has a full roster of characters, including many characters from existing series and anime. They are the best of the best from the world of console and portable RPG titles. Item Points are money that can be used to equip your characters with items in the game to give them new attacks, items, and magic abilities. Item Points are also used to increase a character's MP or PP. You can accumulate Item Points by playing the game. The plot of Dawn of Smiles revolves around the birth of the first human child on the continent of Kirisawa. Humanity's hope for a brighter future came to an end after the human's victory over the Ants, when the level of the surrounding ocean suddenly dropped. Submerged in a vast ocean, the continent of Kirisawa is now in the midst of a harsh winter. The cruel winter and fierce enemy ants are just a small part of the problems that the remaining human population has to deal with. The war-weary population must not only rebuild their villages and cities and create new tools and new crafts, they must also survive the harsh winter and the great danger that comes with it. However, the players of the PAD series can only dream of the future. Special thanks to the following companies: [www.capcom.co.jp/love/](http://www.capcom.co.jp/love/) Tsubaru-san Monsters Inc.
