Electronics stores are everywhere, you can buy anything from any corner of the country. The website of the wireless communications, which is not as easy to find. According to the United Nations, renewable energy is the world's fastest growing source of energy, and it is expected that by the year 2015, solar, wind, geothermal

---

and biofuels will account for 40% of the world's total electricity generation. But it's not only the outside world that wants to harvest the energy of the sun and wind. Within the U.S., there has been a huge shift in favor of renewable energy, and that is reflected in every state. Now more than ever before, people are

---

harnessing the power of the sun to generate electricity to help save on bills, and to help the planet. In the state of Hawaii, the use of solar power has grown by 744% in the past five years. Even with larger cities, such as Phoenix, Arizona, solar power generation is on the rise. The energy resources of the state are abundant,

---

but there are still concerns with the air and the environment. What Is Ethanol? Ethanol is a sweet alcohol that is a byproduct of fermentation of grains, butternuts, or other vegetable matter. It is a cleaner-burning fuel than petroleum-based fuels, and it is most often used as a blending fuel. Ethanol is used in the following
