XHcode Serial Keygen [XHcode 2.0.0.0.Crack] Direct Link.Q: Finding a continuous and bounded function that attains its infimum Let u be a nonnegative measurable function in the whole \mathbb{R}^n that only assumes the values zero and infinity. Let $M = \inf_{x \in \mathbb{R}^n} u(x)$. Find a continuous and bounded function f with the property that $\lim_{x \rightarrow \infty} f(x) = +\infty$ and $\lim_{x \rightarrow -\infty} f(x) = -\infty$. (this problem from the book "Analysis" by Kreyszig) The first idea i got is to use the Cantor-Schröder-Bernstein theorem. So to prove the existence i have to find a continuous and bounded function g and a function v such that: $\lim_{x \rightarrow \infty} g(x) = +\infty$ and $\lim_{x \rightarrow -\infty} g(x) = -\infty$. Then $g+v$ satisfies the conditions of the theorem. But it does not really worked well as it is a variation of the Schauder theorem. So what if the functions I try to find are not bounded? Thank you in advance, Mateusz A: The required function f can be obtained by a selection in the following way. By the definition of M , for every $\epsilon > 0$ there exists $R > 0$ such that $M - \epsilon$ be a real number such that $\int_{|x| < R} u(x) dx < \epsilon$
