[Main Features]

■ **Action RPG Experience of Rising Is Aimed to Go Beyond** Something that immediately stands out about Terra Battle is that we are employing a newly developed real-time strategy game engine. We draw upon the experience and skills of countless games, asking ourselves what is a real-time action RPG? From that perspective, the concept of game development aims to create something unique, using new technologies and developing new contents while accepting the feedback from existing users. The action RPG has until now been considered a strategy RPG that is played with auto-battle. However, it has had a problem because the succession of the player's actions is limited. 【Ride Battle】, a previous product released by us, did not offer an environment suited for wide-ranging actions, so that an environment that allows player actions is mainly first-person shooter games. To this end, we are trying to create a new environment that catches the attention of action RPG users. Having Torpidity and Windmark, we are trying to create an environment that allows the user to set their own pace.

■ **Strategic Action That Ignites Your Sense of Adventure Battle System and Action Details** The battle system of Terra Battle is able to be played in a sandbox atmosphere, so you can easily enjoy having a fun battle online. The premise is not the "paper battle" of games such as Final Fantasy Tactics, where you have no freedom in battle. Its story starts with your commanding as a leader in the Fortress, and like a paper war, you fight again and again online, with the option to develop your abilities using the Equipment found in battle.

Even through the battle screen, you must be aware of the flow of your teammates, as you coordinate them, and the presence of higher-level teams can completely change the strategy.

By allowing your teammates to equip and open hand-to-hand combat with, you also become able to use the skills of an MMO, such as Physical Force or Magic Attack. This results in battles where three-way skills and attack patterns are displayed, and your opponent's attack is deformed when you are attacked at a weak point. This is a battle system that strives to make attacks unlike any other.

Similarly, in online multiplayer, you can play the game solo or in teams of 3 or
