We examined the psychometric properties of the Neuropsychiatric Inventory (NPI) in a heterogeneous dementia cohort and compared it to the Geriatric Depression Scale (GDS). One hundred forty-eight participants with dementia (n = 112) or without dementia (n = 36) completed the NPI and GDS. The correlation between NPI and GDS was.33, and the NPI was significantly correlated with NPI-NH scores. The NPI was significantly associated with gender, age, education, Mini-Mental State Examination scores, and clinical diagnosis of depression in a multiple regression model. We provide evidence for the reliability and validity of the NPI in a heterogeneous dementia cohort. of the two best teams in the league (Asajj Ventress and Ivan Stimulous) in the Snake Pit's made-up play-off game for the championship. Another part of this was that this just wasn't the type of thing that would have happened in the real game. The Alex Games were only real on Alex's terms, and the smaller community he manipulated didn't have the time, resources, or motivation to create a field of their own out of nothing. So, the whole event served as a temporary distraction for us, and 6d1f23a050
